

MAHMOUD BEN MOUSA

SOFTWARE ENGINEER

Tripoli, Libya • +218 94 2951769 • bmmahmoud28@gmail.com
[linkedin.com/in/mahmoud-ben-mousa-220ba6323](https://www.linkedin.com/in/mahmoud-ben-mousa-220ba6323) • github.com/mahmoudbm77 • ma7moud.ly

PROFESSIONAL SUMMARY

Software engineering student at the University of Tripoli with hands-on experience building responsive websites (including Arabic RTL interfaces) and PHP/MySQL web applications for academic and client projects. Solid foundation in data structures, algorithms, and software security (OWASP Top 10), with practical skills in JavaScript, Python, PHP, and Git. Team player with working knowledge of technical English. Open to freelance work and collaborations.

EDUCATION

Bachelor of Science in Software Engineering | University of Tripoli, Tripoli, Libya **2023 – Present**
English Language Courses | Newcastle, Tripoli, Libya **2022 – 2023**

WORK EXPERIENCE

Freelance Web Developer | Self-Employed | Tripoli, Libya **Jun 2024 – Present**

- Design, develop, and maintain responsive client-facing websites, including Arabic RTL interfaces, using HTML, CSS, and JavaScript.
- Build interactive front-end features for client websites, including lightbox image galleries, masonry layouts, and client-logo marquees.
- Debug and fix layout and cross-device rendering issues, including mobile dark-mode display and image gallery sizing.
- Manage projects independently, from planning and development to delivery and ongoing maintenance.

PROJECTS

FineTrack – Traffic Violations Management System | PHP, MySQL, JavaScript (AJAX)

- Built a web-based system where authorities manage and track traffic fines and drivers check and pay them online, with an Arabic RTL interface.
- Implemented session-based login with “remember me” cookies so returning users stay signed in, and used AJAX (XMLHttpRequest) to update pages without full reloads.

Trend Digital Media – Agency Portfolio Website | HTML5, CSS3, JavaScript

- Designed and developed the portfolio website for Trend Digital Media, a Libyan digital advertising agency, presenting its work across six service categories: Reels, Static Photography, Paid Ads, Designs, Page Management, and Promo.
- Rebuilt the site from a PHP/MySQL application into a fully static HTML, CSS, and JavaScript website.
- Implemented lightbox galleries, masonry layouts, and a client-logo marquee, and fixed responsive and mobile dark-mode issues so the site displays correctly on mobile devices.

Zekr – Islamic Telegram Bot | Python, python-telegram-bot

- Developed a Telegram bot that delivers morning and evening adhkar, the complete Quran text, and an interactive tasbeeh counter.
- Integrated the alquran.cloud API with local response caching.
